Index Overview

Morgan Stanley MAP Trend Index

Strategy Overview

The Morgan Stanley MAP Trend Index (the "Index") employs an investment strategy that aims to build a liquid and risk-balanced portfolio. The Index:

- —Provides exposure to liquid US-listed ETFs of US and foreign equities, US fixed income, and alternatives such as gold, oil, US dollar and REITS, and has the potential for an allocation to a 2-year US Treasuries Index.
- —Employs a disciplined, pre-determined rules-based investing approach with the intent of dynamically investing in assets that exhibit upward trends and paring back investments during market downturns, as well as considering counter-trends or reversals in trend during short-term horizons of equities and alternatives.
- —Aims to control risk daily by applying a volatility control overlay whereby the Index adjusts the exposure to the selected portfolio based on a ratio of 5% to the historical realized volatility. The Index's total exposure to the ETF assets is capped at 125% and any unused portion below 100% is moved to a 2-Year Treasury.
- —Is calculated on an excess return basis. Specifically, the level of the Index is determined by the weighted return of the notional portfolio of index components, reduced by the return on an equivalent cash investment receiving the 3-month LIBOR and further reduced by a servicing cost of 0.85% per annum.

Index Overview

Ticker/RIC:	MSUSMAPT	
Index Sponsor:	Morgan Stanley	
Calculation Agent:	Morgan Stanley & Co. LLC	
Index Type:	Excess Return	
Currency:	USD	
Index Components:	21 (as of 3/7/2019)	
Volatility Target:	5%	
Index Live Date:	March 7, 2017

Morgan Stanley MAP Trend Index

Why Is Dynamic Allocation Important?

In different market environments, dynamic allocation can help to achieve more steady returns as the allocation to each asset will be adjusted across different parts of a market cycle. With dynamic allocation, the Index is able to react to changes in market conditions over time and aims for more stable returns.

Implementing a Trend-Following Investment Strategy

The trend-following investment philosophy means "cut your losses" and "let your profits run on." Developed by an English political economist, David Ricardo, in the 1700s, this investment style is largely behavioral according to price movements and market uptrends and downtrends.¹

Morgan Stanley MAP Trend Index

Index Construction*

Step 1 Compute Risk Budget Weights

The historical realized volatility of each ETF asset is calculated by giving more weight to more recent data. The risk budget weight for each ETF is proportional to its liquidity-driven maximum allowable exposure and the inverse of it realized volatility. **More weight is given to lower-volatility assets and vice versa. Risk budget weights are normalized at 100%.**

Step 2 Analyze Asset Price Trends

Each day, the recent price trend of each ETF is monitored by comparing the current ETF price to its short-term and long-term exponential moving averages. A range from 0 to 1 is the average of a long-term and short-term measure, with smoothing if necessary.

Step 3 Determining Portfolio Weights

Trend signals from Step 2 are combined with normalized risk budget weights from Step 1 to derive the portfolio weights and each ETF is assigned this weight. Any remaining weight is assigned to the 2-Year US Treasury Index, such that the total assigned weights sum 100%.

Step 4 Applying Volatility Target

On a daily basis, a volatility control overlay is applied whereby the Index adjusts the exposure to the selected portfolio based on a ratio of 5% to the historical realized volatility. The index's total exposure to the ETF assets is capped at 125%. Any unused portion below 100% is allocated to the 2-Year US Treasury.

Calculating the Index Value

Is calculated on an excess return basis. Specifically, the level of the Index is determined by the weighted return of the notional portfolio of index components, reduced by the return on an equivalent cash investment receiving the 3-month LIBOR and further reduced by a servicing cost of 0.85% per annum.

This information should not be regarded by recipients as a substitute for the exercise of their own independent judgment and the information provided herein is not an offer, solicitation or a recommendation to buy, sell or hold any security or investment strategy. There can be no assurance that the investments shown herein were or will be profitable and this material does not take into account any investor's particular investment objectives, financial situation, particular needs, strategies, tax status or time horizon.

Specific investment terms are for illustration purposes only and may not reflect the actual terms of an investment product available for purchase from InspereX. This presentation may not contain a complete discussion of investment terms or risks and you should only rely on the information contained in relevant prospectus and/or offering documentation prior to purchasing an investment product or making a recommendation to a customer. A copy of the relevant registration statement, terms sheet, pricing supplement, preliminary official statement (POS) and official statement (OS), financial reports and/or other offering information for registered securities and certain exempt securities may be found at the SEC's (http://www.sec.gov/edgar.shtml) EDGAR database.

Past performance is no guarantee of future results. All investments carry a certain degree of risk and there is no assurance that an investment will provide positive performance over any time period. Different time periods and market conditions may result in significantly different outcomes. The opinions expressed herein are for informational purposes only as of the date of writing and may change at any time based on market or other conditions and may not come to pass. These views may differ from other investment professionals at InspereX, its affiliates and its partners. These views are not intended to be relied upon as investment advice or recommendations, do not constitute a solicitation to buy or sell securities and should not be considered specific legal, investment or tax advice.

This material may include discussions of securities or financial products that InspereX may have positions, long or short, or held proprietarily. InspereX may execute transactions which may not be consistent with any discussion or conclusion contained herein. InspereX may also have received compensation for performing investment banking services or be (or has previously been) engaged in soliciting or performing other services for the issuer(s) of the securities discussed herein. Further, InspereX may have received compensation as a manager or co-manager in a public offering for the issuer(s) mentioned herein.

The investment products discussed herein are considered complex investment products. Such products contain unique features, risks, terms, conditions, fees, charges and expenses specific to each product. The overall performance of the product is dependent upon the performance of an underlying or linked derivative financial instrument, formula, or strategy. Return of principal is not guaranteed and is subject to the credit risk of the issuer. Investments in complex products are subject to the risks of the underlying reference asset classes to which the product may be linked, which include, but are not limited to, market risk, liquidity risk, call risk, income risk as well as other risks associated with foreign, developing or emerging markets, such as currency, political, and economic risks. Depending upon the particular complex product, participation in any underlying Market-Linked Product is subject to certain caps and restrictions. Any investment product with leverage associated may work for or against the investor. Market-Linked Products are subject to the credit risk of the issuer. Investors who sell complex products or Market-Linked Products prior to maturity are subject to the risk of loss of principal, as there may not be an active secondary market. You should not purchase a complex investment product until you have read the specific offering documentation and understand the specific investment terms, features, risks, fees, charges and expenses of such investment.

The information contained herein does not constitute an offer to sell or a solicitation of an offer to buy securities. Investment products described herein may not be offered for sale in any state or jurisdiction in which such an offer, solicitation or sale would be unlawful or prohibited by the specific offering documentation.
